SUBJECT: Northwest Pipeline GP Potential Compressor Waste Heat Recovery Opportunities For the Twelve Months Ending December 31, 2008

Qualified Compressor Stations 1	Meets Load Factor Requirement 2
1 Sumas	Yes
2 Mt. Vernon	No
3 Snohomish	No
4 Sumner	No
5 Willard	No
6 Goldendale	Yes
7 Roosevelt	No
8 Burley	Yes

1 Qualified Compressor Station are stations where Northwest has gas turbines at a compressor station that in aggregate have total ISO-rated horsepower equal to or greater than 15,000 horsepower. Actual site-rated horsepower may be less.

2 Indicates whether or not gas turbines at a compressor station have, in aggregate, operated at least 5,250 hours for the report period stated above.

Please contact Pete Richards at (801) 584- 6705 if you have any questions about compressor waste heat opportunities.
